

e-HLbc Health Sector Cost-Sharing Model

The allocation of costs among the health authorities will be based on the *Patient Safety & Learning System Cost Sharing Formula* (October 2008), which is the formula used by the Ministry of Health Services to allocate the global health care budget.

The allocation is based on population served by the Health Authorities (number of people plus a number of other factors related to the type of patients served, services provided, etc).

Recommended and approved for use for the three-year licensing period beginning April 1, 2009 and ending March 31, 2012, health sector costs will be allocated as follows in the December 2008 *Business Case for Renewal*:

VCHA - 25%
VIHA - 16%
FHA - 22%
IHA - 15%
PHSA - 16%
NHA - 6%
